Subject: **NPDES Construction General Permit Tracking No. TNR111881  
 Southeastern Tennessee State Regional Correctional Facility (also known as  
 Bledsoe County Correctional Complex)  
 State of Tennessee - Department of Finance and Administration  
 Pikeville, Bledsoe County, Tennessee**

Dear Mr. Steck:

The Division of Water Pollution Control (the division) acknowledges receipt of the Notice of Intent (NOI) form for the above referenced project. The NOI was received on April 19, 2010. The NOI was submitted to obtain coverage under a General NPDES Permit for Storm Water Discharges Associated with Construction Activity. Enclosed is the Notice of Coverage (NOC) form which shows the site name and location, receiving stream, effective date of coverage, etc.

**Contractor Information**

The division does not normally transmit a copy of this letter to your contractor(s). You should make sure that all contractors listed on the NOI are aware of the General Permit requirements.

**Storm Water Pollution Prevention Plan (SWPPP)**

You have submitted a Storm Water Pollution Prevention Plan (SWPPP) as required by Part 1.4.2 of the CGP. Please note that the division has not performed an engineering review of the SWPPP and does not certify whether the SWPPP adequately provides for the pollution prevention requirements at the site as described in the general permit. The division acknowledges that you have submitted a SWPPP that appears to include the required components of a SWPPP. It is the responsibility of all site operators to design, implement, and maintain measures that are sufficient to prevent pollution at the referenced site, and to remain in compliance with the terms and conditions of the general permit.

**High Quality Waters**

The receiving stream for a construction site for which the NOI was submitted appears on the state's list of high quality waters, as identified by TDEC. Since the discharge from the proposed construction site may contain significant amounts of silt, the division considers the potential for degradation to the receiving stream from the discharge to be significant. Therefore, additional pollution prevention

requirements, as described in the general permit, Subpart 4.4., for discharges into high quality waters apply to your construction site; requirements of Section 4.4.2. apply to your construction site only if an impaired segment is located on or adjacent to the disturbed area.

We appreciate your attention to the general construction storm water permit and its requirements. We believe this does make a difference to the quality of state waters. If you have any questions, please contact Micah Gravitt at (423) 634-2547 or by e-mail at *Micah.Gravitt@tn.gov*.

Sincerely,
